Estimate for this Date Range *
01/11/2018 to 31/10/2019

Estimation Method *
Seasonal Adjustment
Simple Average
3 month window
6 month window
Seasonal Adjustment

Select your preferred method of estimate calculation

Calculate

Clear

- Seasonal adjustment (Preferably use this one) – this method uses data from the same period in the previous year to calculate the estimates allowing for seasonal variances
- Simple average – allows you to select the date range that should be used for calculating the estimates (this is useful if there is only one “good” record to use)
- 3 month window – uses the last 3 months of data to calculate the estimates
- 6 month window – uses the last 6 months of data to calculate the estimates

Estimate Data

Estimate Data

Enter criteria to generate data estimates for the selected period, using the chosen estimation method. The generated estimates will then be displayed and can optionally be saved in the system.
